The anime genre kicked off slowly with a few old series that soon became classics and, with time, it started influencing not just TV but also other aspects of daily life, such as fashion. This industry began creating a multitude of shows based on real life, fantasy, romance, action or war, and some of them touched our heart and became our favorite. www.getpandasextractor.com is a web app designed to make it easier to manage and parse different kinds of video. Use it to download videos from websites The video downloading feature is a significant part of the app and, for that reason, you can use it for several purposes, such as saving your favorite video from a website, downloading different videos from YouTube or many other media platforms, and converting various formats (e.g. MP4, MP3, and 3GP). So, you can download videos from different websites directly into your computer, open videos directly from the app's file manager, and download them into the app as well. Additionally, you can use the app to download videos from various web services, including Vimeo, DailyMotion, Vevo, and iTunes. Work with different video formats Besides uploading videos and downloading them, the app provides some useful features. For example, you can select videos and choose one of the following formats, such as FLV, MPEG, MP4, H264, M4V, WebM, AVI, 3GP, 3G2, MOV, MXF, VOB, WMV, and WAV. After that, you can set the quality, set a password for this video, and either save it directly to the computer or open the file manager and save it in a certain directory. Open videos from your local device The app also allows you to convert videos from one format to another. For instance, you can convert any video in the supported formats into MP3, WMA, MP4, WAV, 3G2, FLAC, AIFF, AAC, AC3, and APE. The app can even convert movies from one format to another, for example, convert 3GP to MP4. Download and convert videos to various formats Besides all the great features offered by the app, it's also a handy tool. The video downloading feature enables you to download and convert videos from various sites or services directly from the app and save them into a certain folder or directly into the computer. If you want, you can choose the format
