Windows Many programs use COM for automation; for example, Autodesk Revit R20, and earlier versions of

AutoCAD, require programming in a mixture of AutoLISP and Visual Basic.

AutoLISP or Visual LISP is also available for the Windows operating system through AutoCAD LT. In Windows, AutoLISP or Visual LISP

macros and VBA macros are written in the Visual Basic Scripting language. The use of COM is not limited to the Windows operating system, however. In Linux, COM is available in the form of OLE, through which various automation techniques are used. Autodesk Inventor was released with version 11.2 to provide a pure object-oriented programming language, similar to Java and C++. Automation

6 Let  $h(1) = 3*1**2 + 1 + 1$ . Suppose  $-4*v + 28 = 2*y$ ,  $4*v + 0*y - 32 = -2*y$ . What is the remainder when  $h(2)$  is divided by v?

3 Let  $h(p) = 6*p + 42$ . What is the remainder when  $h(-4)$  is divided by 8?

6 Let  $y = 66 + -12$ . Calculate the remainder when y is divided by 11.
