This is a free Mac application developed by the author of MacKeyboardUtils. The creator of this tool is Jens Wannholt. This application works with all versions of Mac OS X. With this application, you can reload the thumbnails of your files with just one click. Also, you can choose the style you like best, for example, I like the colored labels and logos with this tool. FEATURES: * It automatically detects the name of the file with the file extension (in " ".jpg" and " " ".png") and automatically generates the thumbnail for the selected file. * Re-read the type and size of the file and re-generate the thumbnail. * If there is a file with the same name in different folders, it will detect the name of the folder and re-generate the thumbnails of the files that you choose. * It displays thumbnails without using the Quick Look system. * This tool supports the generation of high-resolution thumbnails of files with a resolution of 1920x1080 pixels or higher. This application does not use Quick Look, which means you can run it on

systems with a low system RAM. PREMIUM VERSION: If you want to buy the PRO version, you can do it through this link: The purchase price is $2.99. Please note: In the PRO version, you will have the possibility to change the wallpaper and add more than one color to your labels. The PRO version also allows you to use several themes, and allows you to generate the thumbnails of multiple folders at once. If you want to buy this PRO version, you can do it through this link: Also, you can read more about it at the following link: SCREENSHOTS: KM_SuperThumbTool_Screen_1.jpg KM_SuperThumbTool_Screen_2.jpg KM_SuperThumbTool_Screen_3.jpg 77a5ca646e
