I would like to use Maven as the build tool for my Java project. It seems to be very easy to install, but there are quite a few important questions that I couldn't find a simple explanation for. Let's say that I have created a Java Maven project. How can I pass on this project to someone else? Will it still work fine? The other person doesn't have Maven, so he can not build it on his own. Also, if I wanted to create a multi-module project. 595f342e71
