Customize your PDF documents anytime, any way you want. Save time. Transform your PDF documents into a stand-out present with your company Logo or branding as the visual stamp. Create any custom stamp directly on PDF documents with Adobe Acrobat, no need to open up Adobe Acrobat and create new PDF documents. PDF Stamp supports all major Acrobat versions, including 8, 9, X and 10, and can be integrated to Acrobat 8/9/10. The Stamp item can be added to any document or form in Acrobat by dragging and dropping it onto any page. You can also stamp a custom stamp directly on the page. The Stamp item is reusable, which means you can easily copy and paste it to other documents and forms. Stamps come in 3 types: - Access Control Stamps: These stamps will automatically be created for certain areas of your document. For example, you can create stamps for 'confidential', 'top secret', 'proprietary' or 'not to be reproduced in part or in whole'. - Typographic Stamps: You can create a stamp for your company logo. This item can be also used as the background for Text, Drawing or other items. - Overlay Stamps: These stamps can be used to highlight specific text or objects in your document or form, similar to labels. Remember, once you created a stamp, you can reuse it multiple times. You can also export the stamp item to XML and store your stamps in your PDF documents or Acrobat journals. VisualStamp Component Overview VisualStamp works directly with Acrobat and can be added to all 8th edition and up as well as PDF documents and forms. VisualStamp has been tested for: Acrobat 8 Acrobat 9 Acrobat X VisualStamp Component Architecture VisualStamp is a standalone Acrobat component. It was designed and tested for Acrobat 8 / 9/ X. But it can also work fine with Acrobat 10. VisualStamp is a standalone Acrobat component, so there are no dependencies on external Java classes or external files. VisualStamp has been tested for Acrobat 8 / 9/ X, but it also supports Acrobat 10. VisualStamp is a component and not an add-in. It was designed so that it can be used with Acrobat and then also used as a standalone component. Stamping is

## What's New in the VisualStamp?
